Lecture 23 Monday 07.12.2015
(8.30-10.10/13.30-15.10)

Overview

- 1. Analysis 3rd Abstract Peer Reviewing
- 2. Data Commentary
- 3. Task Review (Informal Writing)

Timeline until end of Semester

- December 11th: Lecture 24
- December 14th: Lecture 25
- December 28th: Exam
- January 11th: Final Scores

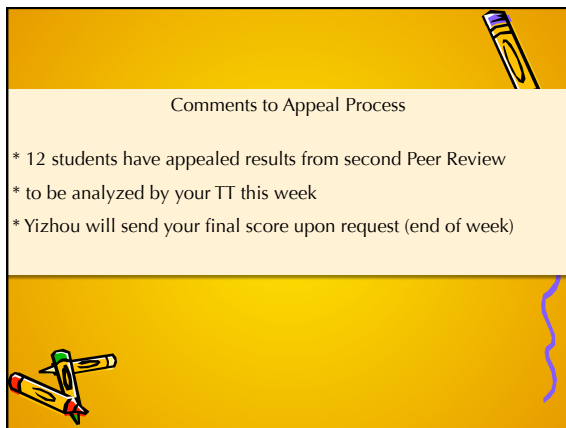

Timeline until end of Semester

December 14th: Lecture 25

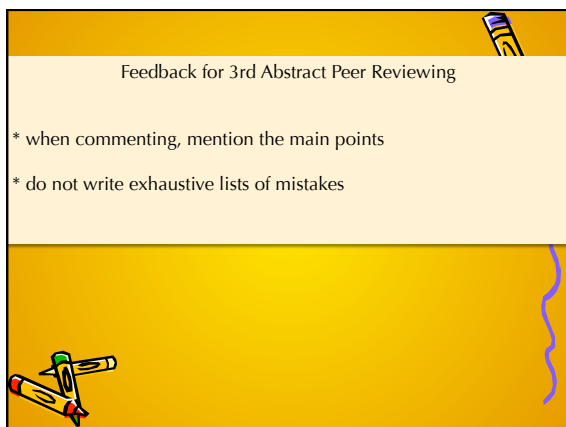

考前复习/答疑

December 28th: Exam

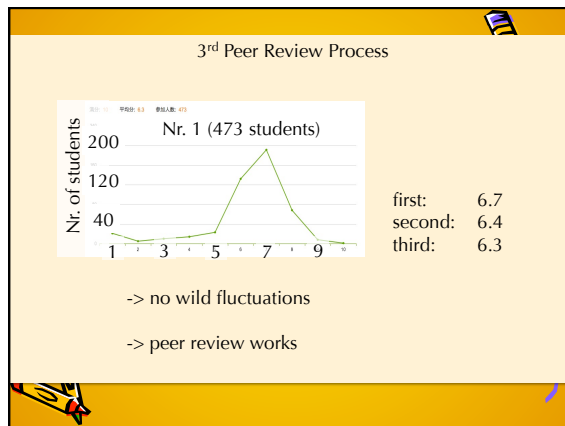

Comments to Appeal Process

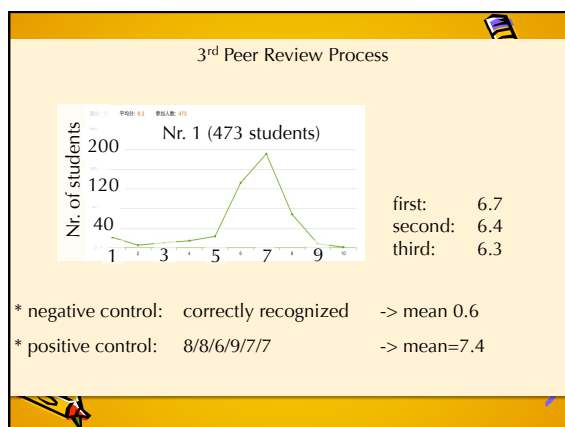

- * 12 students have appealed results from second Peer Review
- * to be analyzed by your TT this week
- * Yizhou will send your final score upon request (end of week)

Feedback for 3rd Abstract Peer Reviewing

- * when commenting, mention the main points
- * do not write exhaustive lists of mistakes

For final abstract:

Abstract ID: xxxxxx

Background: To build a "modernized socialist society" on Chinese soil, the Party has led the country to reform and open up, and to carry out the reform and opening up. The reform and opening up has brought about a profound change in the country's economic, political, cultural, and social life. The reform and opening up has brought about a profound change in the country's economic, political, cultural, and social life. The reform and opening up has brought about a profound change in the country's economic, political, cultural, and social life.

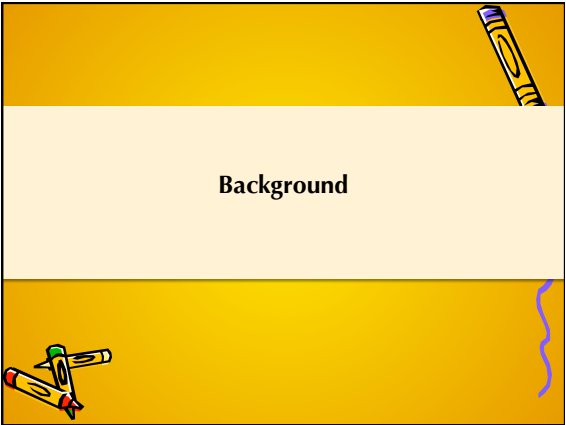

Problem: However, the issue of income distribution remains a major challenge. The difference of wealth between the rich and the poor is still a major problem. The difference of wealth between the rich and the poor is still a major problem. The difference of wealth between the rich and the poor is still a major problem.

Adoption: Therefore, the Party has decided to implement a new model of income distribution. This model is based on the principle of "common prosperity". This model is based on the principle of "common prosperity". This model is based on the principle of "common prosperity".

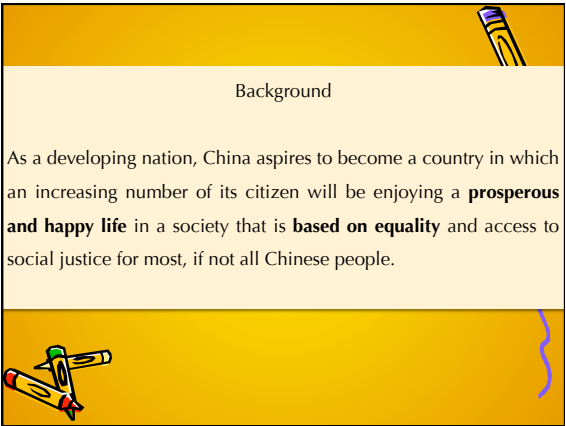

Conclusion: The Party's decision to implement a new model of income distribution is a major step towards achieving common prosperity. This decision is a major step towards achieving common prosperity. This decision is a major step towards achieving common prosperity.

Review Abstract 3

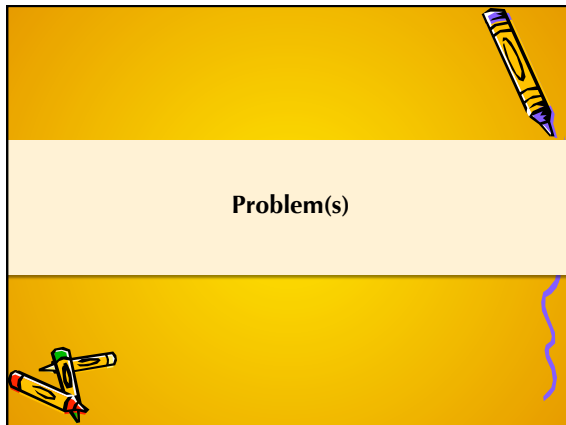

Background

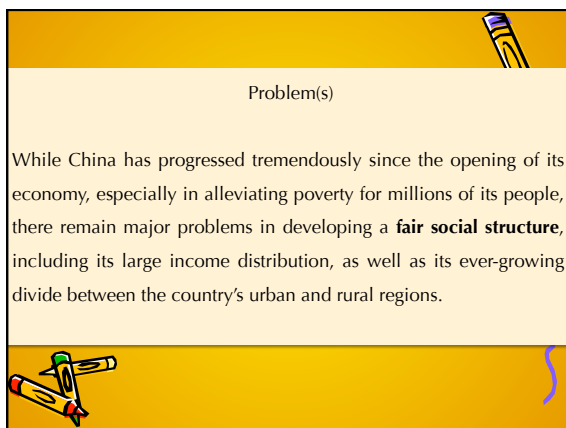

Background

As a developing nation, China aspires to become a country in which an increasing number of its citizen will be enjoying a **prosperous and happy life** in a society that is **based on equality** and access to social justice for most, if not all Chinese people.

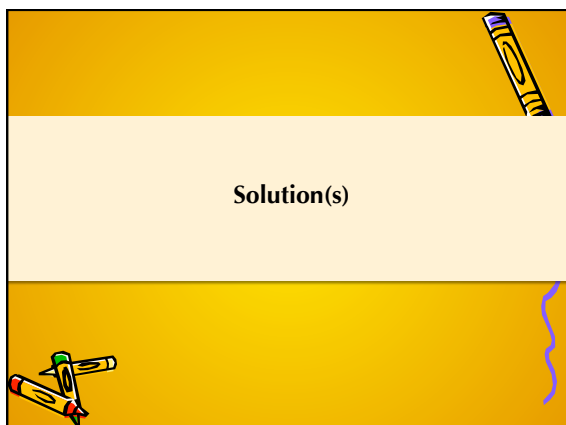

Problem(s)

Problem(s)

While China has progressed tremendously since the opening of its economy, especially in alleviating poverty for millions of its people, there remain major problems in developing a **fair social structure**, including its large income distribution, as well as its ever-growing divide between the country's urban and rural regions.

Solution(s)

Solution(s)

A possible answer to China's growing social issues might be to understand how the model of the Nordic states of Europe, including Finland, Sweden and Norway, can be applied to a system of Chinese characteristics.

The cultures of these countries are characterized by a combination of traits, including a strong sense of social security, a passion for equality, and a consensual system of governance, among other principles. More specifically, their **progressive income tax** and **universal, generous, social security and welfare systems** greatly contribute to the fact that these countries have little poverty and a more egalitarian income distribution than many other developed nations.

Evaluation

Evaluation

It remains to be seen whether these models are applicable to other nations such as China, which has taken a fundamentally different path in its history, with differing principles related to how the individual understands the responsibility of the state for the welfare of its citizens.

Two Examples

Example 1

Background ¶
Under the background of globalization, the Chinese government plans to build an affluent society before 2020. Moreover, social welfare is one of the significant factors to achieve this goal. ¶

Question ¶
However, there still are a number of problems impeded development, including unequal income distribution, rural-urban disparities, and the imperfection of the social security system. ¶

Solution ¶
Therefore, for purpose of developing a modern welfare society, it is worthwhile to reference the Nordic experience of welfare from the states with well-established welfare policy. For instance, redistribute decided by the government and a variety of civil organizations will stimulate the improvement of the social welfare level. ¶

Evaluation ¶
Hence, the conditions of healthcare, pensions and education will be effectively improved. ¶

Example 1

Background ¶
Under the background of globalization, the Chinese government plans to build an affluent society before 2020. Moreover, social welfare is one of the significant factors to achieve this goal. ¶

Question ¶
However, there still are: there remain a number of problems impeded: impeding development of..., including unequal income distribution, rural-urban disparities in..., and the imperfection of the current social security system. ¶

Solution ¶
Therefore, for the purpose of developing a modern welfare society, it is worthwhile to reference the Nordic experience of welfare from the states with well-established welfare policy. For instance, redistribute decided by the government and a variety of civil organizations will stimulate the improvement of the social welfare level. ¶

Evaluation ¶
Hence, the conditions of healthcare, pensions and education will be effectively improved. ¶

Example 2

Background ⁴

Since the late 1970s, China has been experiencing a booming economy, which provides Chinese with confidence on themselves. Recently, Chinese government issued its newest five-year plan. In this official document, building a moderately well off society by 2020 is highlighted as a significant goal for the whole country. However, despite having gained great economic success in the past years, China still suffers from many social problems. Although the government has issued a series of reforms to solve these problems, a large part of them still exist, such as unequal social income distribution, rural-urban disparities and sustainable development. ⁴

Problem ⁴

As a consequence, China should deepen its social reform. However, what policies for reforms should be issued and what welfare state should be built in China are always two serious problems bothering China and its government. ⁴

Solution ⁴

As for these two problems, it seems that China should learn useful experience from western developed countries with advanced welfare states. Among these developed countries, the Nordic countries are excellent models for China, for their principles are similar to Chinese ones and their system of governance is conducive to stable, continuous reform efforts and decisions. ⁴

Evolution ⁴

As a result, building a Nordic Welfare State in China may solve social problems to some extent. Furthermore, Chinese leaders and governments should always process an awareness that the Nordic Welfare State should be modified according to Chinese realistic situation before it is actually built in the whole country. ⁴

Example 2

Background ⁴

Since the late 1970s, China has been experiencing a **bombing: booming** economy, **which provides Chinese with confidence on themselves**. Recently, **the** Chinese government issued its newest five-year plan. **In this official document**, building a moderately well off society by 2020 is highlighted as a significant goal **for the whole country**. However, despite **having gained great economic success: achieved ... success** in the past years, **China still suffers** from many social problems. Although the government has issued a series of reforms to solve these problems, **a large part of them still exist**, such as unequal social income distribution, rural-urban disparities and sustainable development. ⁴ **Problem?** ⁴

Problem ⁴

As a consequence, China should **deepen its social reform: imprecise&unclear**. However, what policies for reforms should be issued and what welfare state should be built in China **are always two serious problems bothering China and its government**. ⁴

Solution ⁴

As for these two problems, it seems: **appears** that China should **learn useful experience from** western developed countries with advanced welfare states. Among these developed countries, the Nordic countries are excellent models **for China**, for their principles **of...?** are similar **to Chinese ones** and their system of governance is conducive to stable, continuous reform efforts and decisions. ⁴

Evolution: Evaluation ⁴

As a result, building a Nordic Welfare State in China may solve social problems **to some extent**. Furthermore, Chinese leaders and governments **should always process an awareness** that the Nordic Welfare State should be modified **according to Chinese realistic situation** before it is **actually built in the whole country**. ⁴

Overview

1. Analysis 3rd Abstract Peer Reviewing
- 2. Data Commentary**
3. Task Review (Informal Writing)

OVERVIEW - Module 2

Unit 4: Data Commentary

1. Strength of Claim
2. Structure of Data Commentary
3. Language Focus: Verbs in Indicative and Informative Summaries
4. Language Focus: Linking as-Clauses
5. Language Focus: Qualifications and Strength of Claim
6. Language Focus: Qualifying Comparisons
7. Language Focus: Dealing with Problems
- 8. Language Focus: Referring to Lines on Graphs**
- 9. Language Focus: Prepositions of Time**

Unit 4 – Data Commentary

Dealing with Graphs

* vocabulary used for graphs different to that used to comment on tables

Unit 4 – Data Commentary

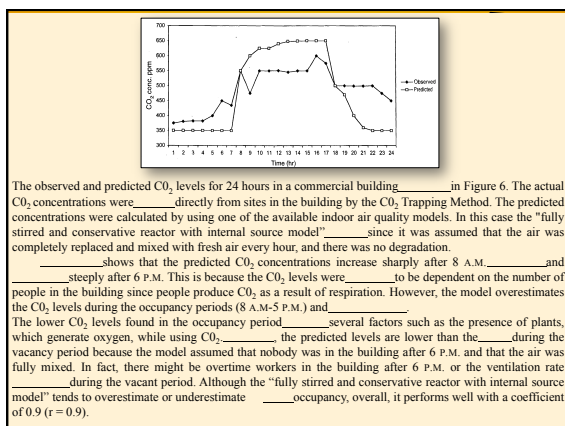

Dealing with Graphs

TASK 38

Complete the sentences provided with the graph

1. The observed and predicted CO₂ levels for 24 hours in a commercial building _____ in Figure 6.

2. The actual CO₂ concentrations were _____ directly from sites in the building by the CO₂ Trapping Method.

3. The predicted concentrations were calculated by using one of the available indoor air quality models. In this case, the "fully stirred and conservative reactor with internal source model" _____ since it was assumed that the air was completely replaced and mixed with fresh air every hour, and there was no degradation.

4. This figure shows that the predicted CO₂ concentrations increase sharply after 8 A.M. _____, and _____ steeply after 6 P.M.

5. This is because the CO₂ levels were _____ to be dependent on the number of people in the building since people produce CO₂ as a result of respiration.

6. However, the model overestimates the CO₂ levels during the occupancy periods (8 A.M.-5 P.M.) and _____.

7. The lower CO₂ levels found in the occupancy period _____ several factors such as the presence of plants, which generate oxygen, while using CO₂.

8. _____, the predicted levels are lower than the _____ during the vacancy period because the model assumed that nobody was in the building after 6 P.M., and that the air was fully mixed.

9. In fact, there might be overtime workers in the building after 6 P.M.; alternatively, the ventilation rate _____ during the vacant period.

9. In fact, there **might have been** overtime workers in the building after 6 P.M.; alternatively, the ventilation rate _____ during the vacant period.

10. Although the “fully stirred and conservative reactor with internal source model” tended to overestimate or underestimate _____ occupancy, overall, it performed well, with a coefficient of 0.9 ($r = 0.9$).

Unit 4 – Data Commentary

Dealing with Graphs

Language Focus: Referring to Lines on Graphs

The sentences provided expand on the information given in Figure 7. **They are not in the correct order.**

Rearrange them in an appropriate order. First, complete on your own online, then work through this task with your group.

- Language Focus: Prepositions of Time
- a) ... the 10th to the 45th minute, hand temperature increased.
 - b) ... the first ten minutes, hand temperature dropped.
 - c) Hand temperature fluctuated ... the period.
 - d) Hand temperature remained over 35C ... the 25th to the 50th minute for the PCM condition.
 - e) Hand temperature remained under 34C ... the 20th minute for the PCM condition.
 - f) The highest temperature occurred ... the 45th minute for the PCM condition.
 - g) ... the last ten minutes, hand temperature decreased for both conditions.
 - h) ... 50 minutes had passed, hand temperature began to decrease.
 - i) ... time 0, hand temperature for both gloves was 22C.

Dealing with Graphs
Language Focus: Prepositions of Time

- a) **From** the 10th to the 45th minute, hand temperature increased.
- b) **During** the first ten minutes, hand temperature dropped.
- c) Hand temperature fluctuated **throughout** the period.
- d) Hand temperature remained over 35C **from** the 25th to the 50th minute for the PCM condition.
- e) Hand temperature remained under 34C **until** the 20th minute for the PCM condition.
- f) The highest temperature occurred **in** the 45th minute for the PCM condition.
- g) **In** the last ten minutes, hand temperature decreased for both conditions.
- h) **After** 50 minutes had passed, hand temperature began to decrease.
- i) **At** time 0, hand temperature for both gloves was 22C.
